Hi Sue

Are the following benefits ok with you, for me to present to Hill's?

> Hill's support will be acknowledged on each keypad and the Hill's logo will be displayed on slides during lectures. A Hill's representative will also be given the opportunity to do a short presentation (up to 10 minutes) at one class where this technology is being utilised.

Kind regards

Ellaine

We can put a logo on the slides

They will get exposure at CVE as well as students

Regarding a lecture – that depends on the topic. We have limited teaching time available as it is. If it's Hills related only, they could have 10 mins or something

Thanks Ellaine

Hi Sue

Just finishing off my re-proposal to Hill's. Can we catch up to talk about how else Hill's can receive benefit from this technology apart from branding the kee-pads. For example, will their logo be able to be shown on slides? Will Hill's be able to present one of these lectures if it is a relevant topic?

Just ideas, happy for you to shoot down or suggest something else. I would like to make it really

appealing to them and very hard for them to turn down ☺

Perhaps we can chat on Monday.

Have a nice weekend.

Ellaine
