Hi Ellaine

Yes, I coordinate these classes for 3rd year students.
The communication for Nutrition would need to be linked into 5th year Rotation or a Nutrition unit. It would be a different focus to our current focus on first few phases of consultation. However I would need (& like) to see the material you mention.

Subject: Hill's Sponsorshi

Hi Jenny

I am sorting out the final bits of the Hill's sponsorship agreement.

As discussed with you, I requested support for the client simulation classes for the next three years.

Hill's just have a couple questions / comments, and I was hoping you could help me with them.

- Who runs these classes? I assume this will continue to be you.

- Hill's would like to discuss how nutrition might be included, and believe that rather than adding a Hill's diet to the scripts, information on how to make a nutritional assessment and recommendation, and discussion around nutrition as the 5th Vital Assessment (5VA) that should be performed on every animal every time it visits the vet, is a more appropriate approach.

- Hill's have materials that they can share on 5VA developed by the American Animal Hospital Association and WSAVA.

I look forward to your comments.

Kind regards

Ellaine Hislop
